Skills

Languages

HTML5, JavaScript, PHP, Python, C#, TypeScript, C, C++, Go

Frameworks

React.js, Angular, Laravel, Vue.js, Next.js, Node.js, Django, ASP.NET, .NET Core

Tools & Platforms

Git, Docker, Jenkins, JIRA, Azure, Webpack

Database Management

SQL Server, MySQL, MongoDB, PostgreSQL, Entity Framework

Education

Kathford College of Engineering & Management

Bsc. CSIT
February 2020 to Present
Bachelor

Experienced developer with expertise in designing and building scalable applications. Demonstrated ability to enhance performance, ensure security, and deliver tailored solutions to meet client needs. Strong communicator, adept at collaborating within teams, with a focus on writing clean, maintainable code and meeting project deadlines.

Projects

Business Connect

- Enhanced Professional Networking:** Created "Business Connect," a dynamic social platform, streamlining professional connections, and introducing personalized features that enhanced user experience and retention.
- Scalable Backend & Real-Time Features:** Integrated MongoDB for efficient data management, significantly improving backend performance, and implementing real-time messaging to increase user interaction, platform responsiveness, and overall system reliability.

School DataHub

- Streamlined Student Record Management:** Developed a .NET application with SQL Server to automate student data tracking, and enhancing data accuracy, while providing an intuitive interface for administrators to access and update records.
- Optimized Database Performance & Security:** Optimized SQL Server queries, while implementing security measures such as encryption and access controls for scalable, secure, and compliant data access across the system.

Employee Management System

- Refined Employee Tracking:** Built an employee management app with React and Node.js, streamlining HR workflows, and simplifying employee data access, resulting in improved decision-making and reduced administrative overhead for HR teams.
- Robust Data Security & Storage:** Utilized MongoDB for secure and scalable storage of employee records, implementing access control measures, encryption, and backup strategies to ensure data protection, confidentiality, and compliance with privacy regulations.
